PROFESSIONAL SUMMARY

Pre-final year AI & Machine Learning engineering student with hands-on experience in data cleaning, preprocessing and exploratory analysis using Excel, SQL, Power BI and Python. Built dashboards and pivot tables to surface business insights, and applied SQL queries through coursework. Passionate about applying data analysis, visualization and machine learning to solve real-world problems.

TECHNICAL SKILLS

Data & Analysis: SQL, Excel, Power BI, Tableau, Data Cleaning, Data Preprocessing, Data Analysis, Data Visualization, Dashboards, Pivot Tables, Statistical Analysis, Reporting, Business Intelligence

Programming: Python, Java

Data Libraries: Pandas, NumPy

Tools: Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

Superstore Sales Data Analytics

Microsoft Excel, Power BI

- Cleaned and preprocessed Superstore sales data by removing duplicates and standardizing text, date and numerical formats.
- Filtered and organized dataset records in Excel to improve data quality for analysis.
- Built pivot tables and dashboards to identify sales patterns and surface business insights for reporting.

Credit Score Model Prediction

Python, NumPy, Pandas, Scikit-learn, Excel, Kaggle

- Built a machine learning project to predict customer credit-score / risk categories from financial and personal attributes.
- Collected the dataset from Kaggle and cleaned / preprocessed it using Excel and Pandas.
- Used NumPy and Pandas to handle missing and inconsistent values and prepare features for model training and evaluation.

Handwritten Character Recognizer

Python, Machine Learning, Neural Networks, Computer Vision

- Developed a machine learning based handwritten character recognition project.
- Applied image preprocessing and model training to classify handwritten characters.

INTERNSHIP EXPERIENCE

Data Analyst Intern — Spark Info Solutions

Offline | May 2026 – June 2026

- Cleaned and analyzed Superstore sales data in Excel to identify patterns and support business reporting.
- Built pivot tables and dashboards to improve visibility into sales trends.
- Improved data quality by removing duplicates and standardizing formats across the dataset.

Machine Learning Intern — CodeAlpha

Remote

- Worked on Credit Score Model Prediction and Handwritten Character Recognizer projects.
- Applied data preprocessing, model training and evaluation using Python and machine learning libraries.

EDUCATION

B.Tech, Artificial Intelligence and Machine Learning

R.M.D Engineering College | 3rd Year (Pre-final year) | CGPA: 7.61 (current)

CERTIFICATIONS

- Oracle APEX Cloud Developer — Oracle
- Oracle Agentic AI Certified Foundations Associate — Oracle

ACHIEVEMENTS / ACTIVITIES

- Completed certifications in AI, Cloud and Programming from Oracle and NPTEL.
- Practiced coding and problem-solving on Skillrack and CodeTantra.
- Completed self-paced courses in Generative AI, Agentic AI and Industry 4.0.
