PROFESSIONAL SUMMARY

Pre-final year AI & Machine Learning engineering student with hands-on experience in data cleaning, preprocessing, and exploratory analysis using Excel, SQL, Power BI, and Python. Competent in building structured pipelines, analyzing business trends through pivot tables/dashboards, and solving algorithmic problems. Passionate about leveraging robust data workflows and machine learning methodologies to architect impactful, real-world analytical software solutions.

TECHNICAL SKILLS

Data & Analysis:	SQL, Excel, Power BI, Tableau, Data Cleaning, Data Preprocessing, Data Analysis, Data Visualization, Dashboards, Pivot Tables, Statistical Analysis, Reporting, Business Intelligence
Programming:	Python, Java, Relational & NoSQL Database Architecture
Data Libraries:	Pandas, NumPy, Scikit-learn
Tools:	Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

Superstore Sales Data Analytics	Microsoft Excel, Power BI
- Cleaned and preprocessed Superstore sales data by removing anomalies, drop duplicates, and standardizing formats. - Organized dataset records inside Excel spreadsheets to maintain strict target data quality standards. - Built comprehensive dashboards and pivot tables to track operational sales configurations and generate visual reports.	
Credit Score Model Prediction	Python, NumPy, Pandas, Scikit-learn
- Developed a classification workflow to predict specific customer risk groups based on demographic parameters. - Handled inconsistent attributes and values utilizing programmatic features across Python pandas libraries. - Engineered feature subsets to perform optimal machine learning model training loops and validations.	
Handwritten Character Recognizer	Python, Neural Networks, Computer Vision
- Designed a programmatic machine learning model workflow specialized in processing raw pixel pixel intensities. - Applied customized image transformations, normalization layers, and multi-class classification configurations.	

INTERNSHIP EXPERIENCE

Spark Info Solutions — Data Analyst Intern	May 2026 – June 2026
- Restructured target dataset flows inside standard business tables to surface localized operational summaries. - Engineered custom trends metrics utilizing cross-platform pivot visuals to accelerate analytics visibility.	
CodeAlpha — Machine Learning Intern	Remote
Configured feature preprocessing parameters and pipelines for model validation and error rate evaluations.	

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning	CGPA: 7.61 (Current)
<i>R.M.D Engineering College — 3rd Year (Pre-final year)</i>	

CERTIFICATIONS & ACTIVITIES

- Oracle Credentials:** Oracle APEX Cloud Developer Certified Associate | Oracle Agentic AI Certified Foundations Associate.
- Database Fundamentals:** MongoDB Basics for Student Developers Skill Badge.
- Competencies:** Completed structured certifications and academic assessments covering foundational data logic, problem-solving practices via Skillrack/CodeTantra, and Industry 4.0 system standards.
